

The remote control for the Peugeot 206 CC

What is a RRE20 / 30 module ?

With a 4-channel remote control you can open the already unlocked roof and the windows within a range of 20 meters. The roof will only open or close as long as the button of the transmitter is pushed, this means that the security measures are functional. The module also allows the opening and closing of the roof up to 20 / 30 km/h. Remote Roof Easy (RRE20 / RRE30) can be installed in all 206 CC models.

Function :

- Pushbutton 1: Opens all windows and opens the roof – as long as the button is pressed
- Pushbutton 2: Closes the roof – as long as the button is pressed
- Pushbutton 3: Closes all windows - as long as the button is pressed
- Pushbutton 4: Own option to turn on / off something (e.g. lights)
- A switch under the rear bench to turn on / off the RRE20 / RRE30 function
- The roof can be operated up to a speed of 20 / 30 km/h.
- The security measures are functional – the roof stops working at higher speeds than 20 / 30 km/h

How will the modul be installed ?

The modul will be placed in the trunk under the cover near the roof control. The RRE20 / RRE30 modul needs a grounding and a 12V power source. In the trunk two power cables have to be cut and a new wiring harness needs to be inserted. Installation time: appr. 1h.
