

# RSL Module for the Peugeot 206 CC

## The cushy add-on for your Peugeot 206 CC

### What is a RSL module ?

Are you going bananas when you have to keep pushing or pulling the roof switch all the time to open or close the roof? With the RSL (Roof Switch Lock) you will handle the roof on a fingertip. No annoyance of holding the the roof switch. The second hand remains free. Processor-controlled monitoring of the roof movement ensures reliable function independently of external influences. The module can be used with all 206CC models.

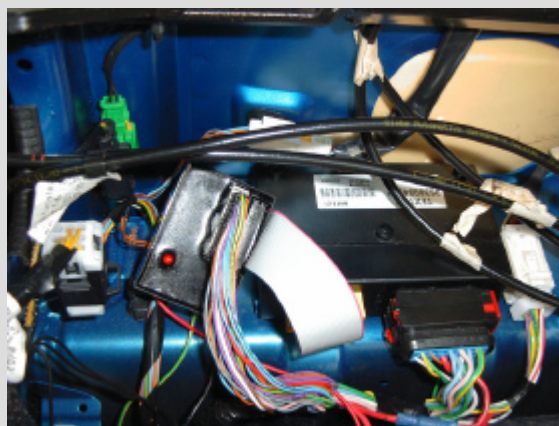

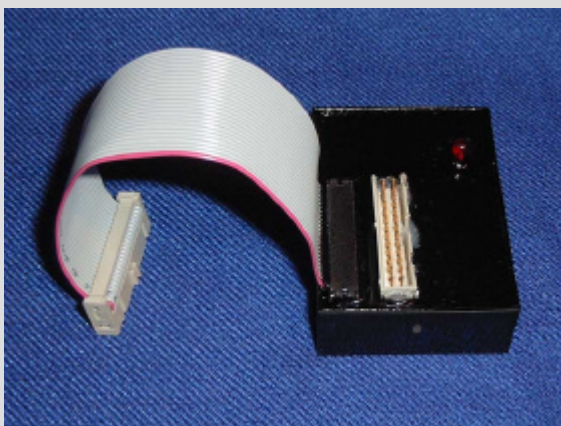

### Characteristics :

- Automatic hold function for the roof switch.
- Stop or invert the moving direction any time by renewed touch of the roof switch
- Accurate control by processor-controlled monitoring the micro switches whether in summer or winter
- Easy deactivation and activation of the RSL-functions (e.g. for visiting a dealer)
- Not visible after installation, deinstallation without any remainders
- 2 years warranty on the functionality of the module.

### How will the module be installed ?

The modul will be placed in the trunk under the cover near the roof control. No cables have to be cut. The RSL module needs no further cables to be connected. To install the module takes approximately 15 min and can be done very easily. You don't need special tools. It is possible to combine the RSL module with other modules: Speed20, Speed30, RRE, RRE20, RRE30

### Safety tips and further information:

- While the roof is moving always remain within range of the roof switch. Danger of injury!
- The usage of the RSL module can cause the loss of your car warranty and the operating permit and can conflict with state or government laws concerning the operation of a vehicle.
- The usage is strictly at your own risk. There is no liability for person / material damages.
